

POLICY: JAA - Assessment

REGULATION:

EXHIBIT:

Seine River School Division recognizes that appropriate educational programming begins with the provincial curricula with consideration of individual student learning needs and abilities. Assessments are completed to determine the learning needs of the students. For some students specialized assessments will be completed to ensure appropriate educational programming.

Assessment results guide programming decisions for all students. Qualified professionals designated by the school board or principal will conduct any specialized assessments, interpret results, follow principles of fair assessment practices and provide parents and classroom teachers with programming recommendations.

APPROVED: June 2013
